birthdateYear	No	Allowed Numbers only (length= 4) (E.g. 1999)
age	No	Allowed Numbers only
ip	No	
optinurl		Allowed Valid URL
optindate		Allowed Format (yyyy-mm-dd)

Example request

Here a request complete with all placeholders to replace with actual values.

http://suprdat.dk/live_delivery_api/rest?apikey=%apikey%&emailId=%email%&firstName=%firstname%&lastName=%lastname%&phone=%phone%&gender=%gender%&address=%address%&postCode=%postcode%&city=%city%&birthdateDay=%birthdateDay%&birthdateMonth=%birthdateMonth%&birthdateYear=%birthdateYear%&age=%age%&ip=%ip%&optinurl=%optinurl%&optindate=%optindate%

Here an example of the placeholders replaced with valid values

http://suprdat.dk/live_delivery_api/rest?apikey=[my_api_key]&emailId=myname@suprdat.dk&firstName=John&lastName=Doe&phone=9100000000&gender=male&address=Kolding,Danmark&postCode=123456&city=Danmark&birthdateDay=01&birthdateMonth=01&birthdateYear=1999&age=20&ip=127.0.0.1&optinurl=optinurl&optindate=optiondate

Response

The endpoint always returns json response object with key 'success' for accepted leads (with 'data' key), and json response object with key 'error' for rejected leads.

Example of lead accepted response
```
{
  "success": "Data Added Successfully",
  "data": {
    "firstName": "John",
    "lastName": "Doe",
    "emailId": "myname@suprdat.dk",
    "phone": "9100000000",
    "gender": "male",
    "address": "Kolding,Danmark",
    "postCode": "123456",
    "city": "Danmark",
    "country": "SE",
    "birthdateDay": "1",
    "birthdateMonth": "1",
    "birthdateYear": "1999",
    "age": "20",
    "ip": "127.0.0.1"
  }
}
```
Example of lead error or rejecred response
```
1)  {"error":"Undefine Api key"}
2)  {"error":"Api key is blank"}
3)  {"error":"Invalid apikey"}
4)  {"error":"Api key is not active. Please contact to admin"}
5)  {"error":"email is required"}
6)  {"error":"email is blank"}
7)  {"error":"Invalid Phone"}
8)  {"error":"Invalid email format"}
9)  {"error":"User is blacklisted"}
10)  {"error":"Duplicate record found"}
11)  {"error":"Gender should be "male" or "female" or other"}
12)  {"error":"Something went wrong. Please try again later"}
```
